CCSS 1.OA.C.6 · EE M.EE.2.NBT.7, M.EE.3.OA.6 · CRA: Pictures · Flow: Standard (2 new routine steps)

Lesson guidance:

Tip: Big first, every time. Pupils who start with the first number count on 7 from 2: slow, and they lose count. Before every item ask "Which is bigger?" and have them touch it.

Tip: Plus means put together. ELL pupils may read + as "and" or not read it at all. Say "plus" and push two groups of counters together each time you say it.

Watch: Counting the start. The most common mistake: 7 + 2 → "7, 8" → 8. The start number is said, not counted. Fix: tap the 7, say it, then put up one finger per count.

What students need to know:

#	Skill or Concept	Atom Type	Teacher Notes
1	**Counting:** the last number said tells how many.	Fact · Pre-requisite	Prerequisite Check a
2	**Next number:** each count is one more.	Fact · Pre-requisite	Prerequisite Check b
3	**Bigger number:** the one said later when we count.	Comparative · Pre-requisite	Prerequisite Check c
4	**Parts and whole:** two parts make the whole.	Conceptual · Pre-requisite	Prerequisite Check d
5	**Plus and equals:** + puts together; = means the same as.	Category · New	Vocabulary band
6	**Count on:** adding 1, 2 or 3 is counting on 1, 2 or 3.	Conceptual · New	Anchor chart step 2
7	**Turn-around:** 2 + 7 and 7 + 2 make the same total.	Fact · New	Another example, big second
8	**Start is said:** the start number is said, not counted.	Comparative · New	Critical Atom (step 2)

What students do:

Step	Task / Routine atom	Tag	Check it with
1	**Find** the bigger number. Circle it.	Pre-requisite	Prerequisite Check c
2	🔑 **Count on** the small number from the big one, without counting the start.	**New · Critical Atom**	Guided cell 1, Check Question, exit b
3	**Write** how many under the line.	New	Independent a–f

How to teach:

Show, then name (steps 1–3). CRA: Pictures — dot tiles and hops. Model 7 + 2, then 2 + 8, then 3 + 3. Fade: Guided ★, Independent ★★, last practice row ★★★.

Common mistakes:

Mistake	Broken step	What it looks like	Fix
Counting the start	2	7 + 2 → 8	Say the start; count only the dots.
Starting small	1	2 + 7 counted from 2	Ask “Which is bigger?”; circle it.
Losing the count	2	7 + 3 → 11	One finger per dot; stop when they match.
Last count only	3	7 + 3 → 3	Say “7 plus 3 equals 10.”

Check Question link (6 + 3): option A = Counting the start (8); option B = Starting small (9, slow route).

one less than the key (exit b → 7)	Counting the start	Feedback: “Say the start, count the dots.”
right answer, counted from the small number	Starting small	Ask “Which is bigger?” before each item
one or two more than the key	Losing the count	One finger per dot; dot tile back on
the small number (7 + 3 → 3)	Last count only	Say the whole frame aloud
“I need one more day.” checked	—	Small group tomorrow: Guided page with counters
