Lesson guidance:

Tip: Tray first, then the picture. Turn a real tray of counters before any drawn array.

Tip: No square in the I Do. A square turns into itself. It waits for the last row.

Watch: Recounting. A pupil who recounts the turned array has not got step 5 yet.

What students need to know:

#	Skill or Concept	Atom Type	Teacher Notes
1	Count by 5	Fact · Pre-requisite	Prerequisite Check a.
2	Recall × 2 facts	Fact · Pre-requisite	Prerequisite Check b–e.
3	**Array fact:** rows × in each row	Conceptual · Pre-requisite	Prerequisite Check f–g.
4	**Turned array:** rows become columns	Comparative	Non-example: a dot added.
5	**Same product: turning adds no dot**	**Conceptual**	**Critical Atom. Ask "Did a dot move away?"**
6	Known fact gives the turned fact	Conceptual	Use the fact. Do not recount.

What students do:

Step	Task / Routine atom	Tag	Check it with
1	Look at the array: count the rows and in each row.	Pre-requisite	"How many rows?"
2	Write the fact.	Pre-requisite	Guided cell 1
3	Turn the array: rows become columns.	New	Tray: "How many rows now?"
4	Write the new fact.	New	Guided cell 2: three boxes
5	**Check: same product. No recount.**	**New**	**Check Question; exit b, c**

Rows tagged New: 3 → Flow: Standard. One chunk: turn the array; the product stays the same.

How to teach:

Turn a real tray of counters first: pupils count once, then see the same total. Ask "Did a dot move away?" First examples: non-square, no repeated digit.

Board: Dot paper: 3 rows of 2, then turned.

Common mistakes:

Mistake	Step	Looks like	Fix	Caught by
A new product	5	6 × 3 = 15	"Did a dot move away?"	Check Question A, Exit b
Adds the two factors	5	6 × 3 = 9	"Times, not plus: same product."	Check Question B
Copies the fact: no swap	4	9, 3, 27 for 3 × 9 = 27	Count the turned rows aloud.	Exit a · Practice 1
Product as a factor	4	45 in the box of exit c	The product is always last.	Exit c · Practice 2

- Practice 2 and exit b, c: one number in each box, no working needed.
- Practice 1: a turned fact read off the turned array is right even if the pupil counted it.
- Cake story: 5 in each row; the two facts 5 × 6 = 30 and 6 × 5 = 30, in either order; the label "cakes" may be left off.
