CCSS 2.NBT.A.3 · **EE** M.EE.2.NBT.3 · **CRA:** Pictorial → Abstract · **Flow:** Chunked

Lesson guidance:

Tip: Keep the chart up. Keep the H T O place chart on the board all lesson.

Tip: No "and" in writing. Pupils who say “three hundred and five” are right to say it. We write “three hundred five”.

Watch: The 0 place. The mistake to stop today is 35 for 305: a 0 place still gets its part.

What students need to know:

#	Skill or Concept	Atom Type	Teacher Notes
1	**Number words:** twenty to ninety-nine, and the teens	Fact · Pre-requisite	Read eleven to nineteen and the tens words; forty has no u. Prerequisite Check a.
2	**Hundreds, tens and ones:** 3 digits are 3 places	Conceptual · Pre-requisite	From 2.NBT.A.1. Prerequisite Check b.
3	**Value of a digit:** the 4 in 347 is worth 40	Conceptual · Pre-requisite	From 2.NBT.A.1. Prerequisite Check c.
4	**Word parts:** the word before "hundred" is the hundreds digit	Category	The rest is a 2-digit number: "three hundred | forty-seven".
5	**Zero holds a place: 305 is 300 + 0 + 5**	**Conceptual**	**Critical Atom. The Critical Atom. A missing tens word means 0 tens.**
6	**Teen or ty:** thirteen is 13, thirty is 30	Comparative	Two hundred thirteen is 213, not 230. Stress the end of the word.
7	**Expanded form:** each digit is worth digit times place	Conceptual	The 3 in 347 is worth 300, not 3.
8	**Written form:** no "and" in a written number	Fact	Accept "and" when spoken; model the written form.

What students do:

Step	Task / Routine atom	Tag	Check it with
1	Write the hundreds part: the hundreds digit and two zeros.	Pre-requisite	Hundreds digit on the H T O chart
2	Write the tens part: the tens digit and one zero.	New	"What is the 4 worth?"
3	**A 0 place: write 0 for its part.**	**New**	**Is every box filled?**
4	Write the ones part, then read it with plus.	New	Read it back: does it say the number?
5	Words to numeral: one digit for each place.	New	3 boxes, 3 digits

© 2026 Cultivating the Digital. All rights reserved.

What students do:

Rows tagged New: 4 → Flow: Chunked. Chunk 1: numeral to expanded form. Chunk 2: words and expanded form back to the numeral.

How to teach:

1. Draw the H T O chart first, every time: three boxes, so three digits.
2. Cover part of a number word with your hand and read it in two parts.
3. Teach numeral to expanded form first: it has the lowest writing load.
4. Point to each digit and ask what it is worth before writing its part.

Board: teacher models here

Common mistakes:

Mistake	Broken step	Looks like	Fix
Digits, not values	Step 2	305 = 3 + 0 + 5	Ask “What is the 3 worth?” on the chart.
Gives the 0 its place	Step 3	305 = 300 + 10 + 5	No tens: the tens part is 0, not 10.
One place too big	Step 1	305 = 3000 + 0 + 50	Count the zeros: a hundreds part has two.
Drops the 0	Step 3	35 for three hundred five	Fill the H T O chart: 3 boxes, 3 digits.
Teen or ty swap	Step 5	230 for two hundred thirteen	Say the end of the word: teen is ones.

Check Question option A catches **Digits, not values**. Check Question option B catches **Gives the 0 its place**. Check Question option C catches **One place too big**.

Prerequisite routing:

Question	Prerequisite (T2 atom)	If missed → Lesson
a. Number words	Fact · Pre-requisite (atom 1)	Lesson G2 NBT 3a Write numbers to 100 in words
b. Hundreds, tens and ones	Conceptual · Pre-requisite (atom 2)	Lesson G2 NBT 1 Hundreds, tens and ones
c. Value of a digit	Conceptual · Pre-requisite (atom 3)	Lesson G2 NBT 1b The value of a digit
	Rule	0 missed: go on · 1: that lesson first · 2+: the earliest first

Accepted answers:

- Expanded form with a 0 part: 400 + 0 + 6 and 400 + 6 are both right; the key draws 400 + 0 + 6.
- Number words with or without the hyphen (forty-seven, forty seven) are right.
- A spoken "and" (three hundred and five) is not wrong; model the written form.
