What students need to know:

#	Skill or Concept	Atom Type	Teacher Notes
1	**Count a set:** the last number is how many	Fact · Pre-requisite	Prerequisite Check a–b.
2	**Parts and whole:** two parts make a whole	Conceptual · Pre-requisite	Prerequisite Check c–d.
3	**Add within 20:** count on past 10	Fact · Pre-requisite	Prerequisite Check e–h.
4	**Missing whole:** then add	Category · Pre-requisite	Checked again at step 3.
5	Story numbers are parts	Category	Point at each number.
6	**Bar: whole on top, parts below**	**Conceptual**	🔑 **Critical Atom. Cubes on the mat first.**
7	"In all" and "now" ask for the whole	Category	Point at the top box.
8	Same parts, same whole	Comparative	Swap the cube trains (EE .b).

What students do:

Step	Task / Routine atom	Tag	Check it with
1	Find the two parts.	New	Guided cell 1
2	🔑 **Write the parts in the bar.**	**New**	**Check Question; exit slip b**
3	The whole is missing. Add.	Pre-requisite	Prerequisite Check e to h
4	Write the whole in the answer box.	Pre-requisite	Practice 1 a to f

Rows tagged New: 2 → Flow: Standard. One chunk: the two story numbers are the parts; the whole is missing, so add.

How to teach:

1. Cubes first: two trains of cubes on the bar mat, one under each part box.
2. Push the trains together under the top box, then draw the bar.
3. Write the parts before solving: the bar is filled from the bottom up.
4. Do not bold or hunt key words: point at the box the question asks for.

Accepted answers:

- The two parts in either order in the lower boxes.

- The label word is printed: never marked. On P5, any two-part bar, the whole on top.
- The answer box and the top box hold the same number. A blank part box with the right whole: ask for the parts.
- P5 equation: the two parts in either order, + in the circle, then the whole after =.
- Equal parts (★★★): the two part boxes hold the same number.
- Exit slip: sort by the boxes ticked; "one more day" pupils join the cube group next lesson.
